SYM gives the Hot-selling High Wheel a Minor Renovation

The artistic Symphony

SYM Symphony has been countless urban commuters' top choice over the years. Its classical appearance makes every trip elegant in the city. The spirit of rose is imprinted in the new front end. Rose is the symbol of Venus in Roman mythology; also, the idea of rose is the essence in Diada de Sant Jordi, Saint George's Day in Catalonia, Spain. Catalan modernism (Modernismo catalán) is an art and literature movement derived from Spain in late nineteenth century which is the design principle for the new Symphony. The inspiration of Catalan modernism mainly comes from nature. Rose is shaped in the new front end as the key visual. This artistic new front end owns unique floating and layer image of a rose. The artistic Symphony will be seen in the city soon.
